

ROMAN

The wall-mounted integrated luminaire is derived from the integrated conception of architectural lighting. It can easily realize the comfortable indirect lighting demand without ceiling, slot or opening hole, and uniform emitting light to provide soft general light for the space.

The modular design of straight connecting and corner joint minimizes the cost of hardening construction and makes the space shape simpler and smoother.

Technology Ra>98

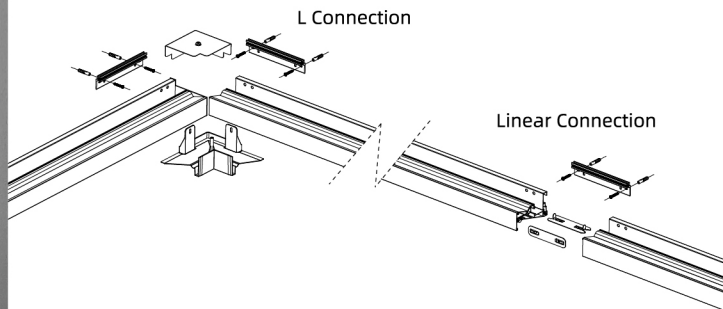

Installation

Uplight with a 110° wide flood creates a homogeneous lighting effect on the ceiling. 35 optics provides both general lighting on the floor and wash lighting on the wall.

A Perfect Replacement Of Cove Lighting + general Downlight.
